Education

National Chengchi University (Ranked 2nd business school in Taiwan) <i>Bachelor's in Management Information Systems (MIS)</i>	Expected Graduation: Jun. 2027 <i>Taipei, Taiwan</i>
<ul style="list-style-type: none">• Cumulative GPA: 4.3 / 4.3 Rank: a/b (~c.d%)• Enrolled in FinTech Program of Specialization (Jan. 2025 – Present)• Previously enrolled in Mathematical Sciences (Sept. 2023 – Aug. 2024)• CS Related Courses: Computer Programming, Data Structure, Introduction to Computer Science, Calculus, Linear Algebra, Statistics(I), Introduction to Data Analysis and Programming, Python for Data Analysis 101, Applications of mathematics softwares (NumPy, Pandas, Matplotlib, TensorFlow, Sklearn), An Introduction to Game Theory (I)	

Research Interests

Information Retrieval; Natural Language Processing; Large Language Models; Machine Learning

Publications

(3 papers in progress)

Work Experience

Research Assistant <i>Far Eastern Memorial Hospital</i>	Dec. 2024 – Present <i>New Taipei, Taiwan</i>
<ul style="list-style-type: none">• Advisor: Dr. Fang-Ming Hung• Research focuses on developing models for disease prediction and generation using LLM/RAG and other ML models, based on existing outpatient, inpatient, and emergency department electronic health records (EHR), examination reports, and SOAP notes.	
AI Intern <i>GoFreight (The world's largest cloud-based freight forwarding software)</i>	Sept. 2024 – Present <i>Taipei, Taiwan</i>
<ul style="list-style-type: none">• Developed AI-powered dynamic web parsing solutions to mitigate crawler disruptions caused by web changes, significantly reducing maintenance costs.• Focused on CV (computer vision) and NLP recognition for logistics documents (e.g., Master Bill of Lading, Invoice), enhancing the accuracy and efficiency of automated document processing.• Technologies utilized: Python, LangFuse, Claude Computer use, AWS S3 & Textract.	
Research Assistant <i>Institute of Information Science, Academia Sinica (The highest-level academic institution in Taiwan)</i>	May 2024 – Present <i>Taipei, Taiwan</i>
<ul style="list-style-type: none">• Advisor: Prof. Ti-Rong Wu, Reinforcement Learning and Games Lab.• Participated in a research project on General computer game solving based on Proof Cost Network (PCN).• Responsible for designing and developing both frontend and backend components of computer games using WGo.js, C/C++.• Designed a high-performance database for managing large-scale game records and AI-analyzed board states, optimizing system architecture to ensure stability, scalability, and efficient data access, supporting a high-performance gaming environment.	
Part-time Engineer <i>ChainSea Information Group</i>	Jul. 2023 – Sept. 2024 <i>Taipei, Taiwan</i>
<ul style="list-style-type: none">• AI Engineer Core R&D Contributor to Open-Source LLM and Whisper Projects at ChainSea, specializing in real-time transcription, inference acceleration, dataset generation and augmentation (e.g., Taipower project under Selected Projects), and model training.• Designed, developed, and optimized RAG architectures to improve knowledge base retrieval accuracy.• Conducted research and development in cutting-edge AI technologies, including the design and implementation of LLM Agent architectures for marketing workflows and a generic framework for topic management.• Technologies utilized: Python, SentenceTransformer, TensorFlow, PyTorch.	

Awards & Honors

2nd Place in HOTAI MaaS Hackathon, [2/233 teams; ~0.8%]

2024

AI Intelligent Travel Checkup. News Article

Taiwan

- A nationwide competition open to all ages, hosted by two giant corporations, Hotai Motor and Microsoft.
- By presenting an innovative forum and AI algorithm for intelligent itinerary check-ups and recommendations, we won second place nationwide and **received a prize of 250,000.**
- I was responsible for system architecture design, AI & full-stack development, as well as delivering the technical presentation and demo.

3rd Place in LINE FRESH Campus Competition, [3/165 teams; ~1.8%]

2024

AI dementia care platform. News Article | Certificate

Taiwan

- A nationwide competition hosted by LINE.
- I was responsible for system architecture design, AI & backend development.

2nd Place in AI Interdisciplinary Sustainability Innovation Competition, [2/44 teams; ~4%]

2024

Campus AI assistant AllPass Project Lead: AI & backend development. News Article | Live Demo | Certificate

Taiwan

Selected Projects

AutoMouser (100+ stars)

2025 – Present

Open Source Contributor | Pull requests | Issues

- AutoMouser leverages LLM-based technology to automatically generate browser automation code from your mouse movements, capturing every click, drag, and hover. This integration streamlines your workflow and enables the creation of robust, repeatable tests with enhanced precision and flexibility.
- Contributing new features, bug fixes, and codebase architecture optimization.

NCCUPass APP

2024 – Present

Role: Head of AI

- Led the AI team in the R&D of the campus AI assistant AllPass and Campus Smart Lost and Found Matching FindPass. As of September 2024, **over 2,000 students** at National Chengchi University have registered and used the platform, and the project has received multiple accolades in startup competitions.

High-Accuracy RAG Retriever Template

2024

Keywords: InformationRetrieval, BM25, Bi-Encoder, Cross-Encoder, FineTuningLLM

- Served as a **core contributor**, responsible for the architectural design and the primary framework development of this High-Accuracy RAG system, which applies RAG and LLM in Financial Q&A.
- I also developed and published a personal open-source project, General RAG Template, to facilitate the integration of RAG and LLM frameworks for a wide range of applications.

Taiwan Power Intelligent Robot Optimization Project

2023

ChainSea Information Group & Taiwan Power (Taiwan's largest electric power company)

- Served as a **core contributor** in leveraging LLMs to enhance and optimize training data for Taiwan Power's official website intelligent AI customer service system, "Dianbao," with the currently deployed version utilizing the improved data we developed.

Activities

Lecturer

Sept. 2023 – Aug. 2024

Google Developer Group (GDG) - NCCU

Taipei, Taiwan

- Teaching Experience: Generative AI, Introduction to Databases (Course satisfaction rate as high as **90%**)
