Work Experience

Undergraduate Researcher

Software Security Lab, MIS, NCCU (Advisor: Prof. Fang Yu)

Sep. 2025 – Present

Taipei, Taiwan

- Research on concolic-assisted model repair for neural networks, focusing on provable localized correction of natural adversarial errors. The approach integrates gradient- and SHAP-based attribution with symbolic reasoning (Z3 / PyCT) to identify and formally repair error clusters in LoRA adapters, achieving sample-efficient and verifiable robustness improvements.

Research Assistant

AI Research Team, Far Eastern Memorial Hospital (Advisor: Dr. Fang-Ming Hung)

Dec. 2024 – Present

New Taipei, Taiwan

- [1] [4] Conduct research on explainable clinical decision support systems, focusing on disease prediction and medical plan generation through the integration of large language models, reinforcement learning, knowledge graphs, and retrieval.

AI Intern

GoFreight (The world's largest cloud-based freight forwarding software)

Sep. 2024 – Jun. 2025

Taipei, Taiwan

- Leveraged MLLM parallelization techniques to extract logistics data (e.g., MBL, invoices) via OCR and NLP, reducing processing time by ~**67%** (from 45s to 15s) while maintaining high accuracy in bounding box annotation and text-to-image mapping.
- Built LLM-based web parsers with up to **97%** accuracy, significantly reducing crawler maintenance for dynamic websites.
- Presented research on LLM Agents and business use cases to support AI strategy.

AI Engineer (Part-Time)

ChainSea Information Group

Jul. 2023 – Sep. 2024

Taipei, Taiwan

- Core R&D contributor to LLM and Whisper projects, focused on transcription, inference acceleration, and LoRA-based model tuning.
- Built RAG pipelines to enhance knowledge retrieval; developed LLM Agent for addiction counseling using structured dialogue planning.
