# Hsin-Ling (Justin) Hsu

Google Scholar: Hsin-Ling Hsu GitHub: JustinHsu1019

LinkedIn: justinhsu101999

justin-code.com justin.hsu.1019@gmail.com

Expected Graduation: Jun. 2027

#### Education

National Chengchi University (Ranked 2nd business school in Taiwan)

B.S. in Management Information Systems (MIS)

Taipei, Taiwan

- Rank: 2 / 38 | GPA: 4.3 / 4.3
- Previously enrolled in Mathematical Sciences (Sept. 2023 Aug. 2024), and have since continued collaborating with Prof. Jengnan Tzeng from the department on research projects [2] and [3].
- Related Courses: Calculus, Linear Algebra, Statistics(I), Statistics(II), Machine Learning, Operations Research/Management Science, Computer Programming, Data Structure, An Introduction to Game Theory (I), Database Management Systems, Introduction to Computer Science, Introduction to Data Analysis and Programming, Python for Data Analysis 101, Al and Society

#### **Research Interests**

Information Retrieval; AI for Healthcare; Large Language Models; Natural Language Processing

### **Publications**

- [1] **Hsin-Ling Hsu\***, Cong-Tinh Dao\*, Luning Wang, Zitao Shuai, Thao Nguyen Minh Phan, Jun-En Ding, Chun-Chieh Liao, Pengfei Hu, Xiaoxue Han, Chih-Ho Hsu, Dongsheng Luo, Wen-Chih Peng, Feng Liu, Fang-Ming Hung, and Chenwei Wu. *MedPlan: A Two-Stage RAG-Based System for Personalized Medical Plan Generation.* Under Review at ACL 2025 Industry Track.
- [2] **Hsin-Ling Hsu** and Jengnan Tzeng. *DAT: Dynamic Alpha Tuning for Hybrid Retrieval in Retrieval-Augmented Generation*. Under Review at COLM 2025.
- [3] **Hsin-Ling Hsu**, Ping-Sheng Lin, Jing-Di Lin, and Jengnan Tzeng. *KAP: MLLM-assisted OCR Text Enhancement for Hybrid Retrieval in Chinese Non-Narrative Documents.* Under Review at The 18th NTCIR, Tokyo, Japan.

## **Work Experience**

## **Research Assistant**

Dec. 2024 - Present

New Taipei, Taiwan

- Far Eastern Memorial Hospital
   Advisor: Dr. Fang-Ming Hung
  - [1] Research focuses on developing models for disease prediction and information synthesis using LLMs, machine learning models, and information retrieval techniques. These models leverage electronic health records (EHR) from outpatient, inpatient, and emergency departments, along with examination reports and SOAP notes.

Al Intern Sept. 2024 – Present

GoFreight (The world's largest cloud-based freight forwarding software)

Taipei, Taiwan

- Developed LLM-powered dynamic web parsing solutions to mitigate crawler disruptions caused by web changes, significantly reducing
  maintenance costs.
- Applied OCR, NLP, and computer vision techniques to extract and analyze logistics documents (e.g., Master Bill of Lading, Invoice), improving the accuracy and efficiency of automated document processing.

Research Assistant May 2024 – Present

Institute of Information Science, Academia Sinica (The highest-level academic institution in Taiwan)

Taipei, Taiwan

- Affiliated with Prof. Ti-Rong Wu's Reinforcement Learning and Games Lab, supporting the research project General Computer Game Solving based on Proof Cost Network (PCN) through system development.
- Responsible for designing and developing both frontend and backend components of computer games using WGo.js, C/C++.
- Designed a distributed multi-database framework for managing large-scale game records and Al-analyzed board states, ensuring system stability, scalability, and efficient data access across components in a high-performance gaming environment.

Part-time Engineer Jul. 2023 – Sept. 2024

ChainSea Information Group

. Taipei, Taiwan

- Al Engineer | Core R&D Contributor to Open-Source LLM and Whisper Projects at ChainSea, specializing in real-time transcription, inference acceleration, dataset generation and augmentation (e.g., Taipower project under Selected Projects), and model training.
- Designed, developed, and optimized RAG architectures to improve knowledge base retrieval accuracy.
- Conducted R&D in advanced AI technologies through the development of a dialogue system designed to engage individuals struggling with drug addiction, leveraging LLM Agent architectures and a conversational topic management framework based on stack- and branch-based structures integrated with function calling mechanisms.
- Technologies utilized: Python, SentenceTransformer, TensorFlow, PyTorch.

#### 2nd Place in HOTAI MaaS Hackathon, [2/233 teams; ~0.8%]

Al Intelligent Travel Checkup. News Article | GitHub | Certificate

2024 Taiwan

- A nationwide competition open to all ages, hosted by two giant corporations, Hotai Motor and Microsoft.
- By presenting an innovative forum and AI algorithm for intelligent itinerary check-ups and recommendations, we won second place nationwide and received a prize of 250,000.
- I was responsible for system architecture design, AI & full-stack development, as well as delivering the technical presentation and demo.

#### 3nd Place in LINE FRESH Campus Competition, [3/165 teams; ~1.8%]

2024

Al dementia care platform. News Article | GitHub | Certificate

Taiwan

- · A nationwide competition hosted by LINE.
- I was responsible for system architecture design, AI & backend development.

## 2nd Place in AI Interdisciplinary Sustainability Innovation Competition, [2/44 teams; ~4%]

2024

Campus AI assistant AllPass Project Lead: AI & backend development. News Article | Live Demo | Certificate

Taiwan

## Selected Projects

## AutoMouser (100+ stars)

2025 - Present

Open Source Contributor | Pull requests | Issues

- · AutoMouser leverages LLM-based technology to automatically generate browser automation code from your mouse movements, capturing every click, drag, and hover. This integration streamlines your workflow and enables the creation of robust, repeatable tests with enhanced precision and flexibility.
- Contributing new features, bug fixes, and codebase architecture optimization.

**NCCUPass APP** 2024 - Present

Role: Head of AI | Advisor: Prof. Augustin Lu

• Led the AI team in the R&D of the campus AI assistant AllPass and Campus Smart Lost and Found Matching FindPass. As of September 2024, over 2,000 students at National Chengchi University have registered and used the platform, and the project has received multiple accolades in startup competitions.

## **Taiwan Power Intelligent Robot Optimization Project**

2023

ChainSea Information Group & Taiwan Power (Taiwan's largest electric power company)

 Served as a core contributor in leveraging LLMs to enhance and optimize training data for Taiwan Power's official website intelligent AI customer service system, "Dianbao," with the currently deployed version utilizing the improved data we developed.

#### **Activities**

Lecturer Sept. 2023 - Aug. 2024

Google Developer Group (GDG) - NCCU

Taipei, Taiwan

• Teaching Experience: Introduction to Databases, Generative AI (Course satisfaction rate as high as 90%)

**Security Research** 2024 - Present HITCON ZeroDay Platform Remote

Reported multiple security vulnerabilities, prompting rapid emergency patches from affected organizations.

2023 - Present

Successfully completing 10+ software development and technical consulting projects.

Remote

• Experienced in web scraping, LLM-based stock fundamental analysis data processing, ML stock price prediction project consulting, AI for board games, etc.
